2024

Designing the **Jaaklac Intentions** connecting digital rights and education, with issues around youth, linguistic inclusion, climate justice, academic freedom and new masculinities. Advancing these with our thriving Community dedicated to local causes that resonate globally.

2023

Launching the **Critical Digital Education for All** Campaign at RightsCon and Feira GG with +15 civil society organisations, educators, activists and youth. Starting in Latin America and expanding globally.

2022

No Minor Futures global educational campaign with animated stories about the hopes and fears of teenagers and young people around Artificial Intelligence. Openly sharing resources to replicate the experience. (Creative Media Awardee of the Mozilla Foundation).

Latine Data Detox Saga adapting Tactical Tech's Data Detox resources into a social media campaign. Implementing workshops with activists, schools and NGOs, to create stories about the experiences and recommendations of young people in Latin America

2021

Digital Comprehensive Sexuality Education co-designing an educational guide with adolescents in Uruguay. Researching online sexual risks and elaborating on solutions from tech, education, policies and international solidarity (Digital Rights Rapid Response Fund).

Glocal Mesh LAC creating a toolkit with educators, technologists, researchers and activists on human rights, internet, challenges and opportunities from community networks (Líderes 2.0 LACNIC)

2020

Starting **Internet days** in Sweden.

JAAKLAC
INICIATIVA

We research and advocate for a Critical Digital Education focused on the younger generations. We recognise the knowledge of excluded groups, especially in Latin America and the Global Majority (the so-called Global South).

We envision fairer digital societies through quality education promoting critical thinking, human rights and participation.

What are the gaps and advances in education with and about digital technologies? What digital education fosters an understanding of social, political, economic and environmental implications?
What collective actions facilitate knowledge for democracies and social justice in the digital age?

Check out our various projects and opportunities to share, learn and do! Critical Digital Education for All.

JAAKLAC is an acronym that represents our values in several American languages. We remix 'hack' into 'jak'. 'JAAKing occurs when diverse communities orchestrate digital technologies for the common good and the environment.

JAAKLAC INICIATIVA

Write down keywords, phrases, drawings or names of projects you have implemented or know about. Use different colours for past, present and future actions.

HOW CAN WE RAISE AWARENESS AROUND THE EFFECTS OF DIGITAL TECHNOLOGIES ON SOCIAL RELATIONS AND THE ENVIRONMENT?

HOW CAN WE BROADEN THE PARTICIPATION IN DIGITAL CONTEXTS?

JAAKLAC INICIATIVA

Mark the position of these efforts in the different dimensions that we promote from Jaaklac in the quadrant of research, education, activism and community.
